Summary

Full-Stack Web Developer building web applications across the frontend and backend with **JavaScript, React.js, Angular, TypeScript, Node.js, Express.js, and REST APIs**. Developed projects in AI-powered platforms, healthcare, e-commerce, and finance, delivering **responsive interfaces, integrated workflows, backend services, authentication, background processing, and tested features**.

Education

ITI 9-Month Professional Training Program - Web & UI Development Track, 10/2025 – 08/2026
Information Technology Institute (ITI) - Software Development Smart village, Giza

- Completed intensive software engineering training focused on scalable full-stack applications, modern web technologies, RESTful APIs, software architecture, clean code, testing, Git, and Agile practices.

B.Sc., Faculty of Computers and Information Technology, 09/2021 – 06/2025
The Egyptian E-Learning University (EELU).

GPA: 3.45/4.0

Graduation Project Grade: Excellent

Experience

Programming Instructor, iSchool. 07/2025 – 09/2025

- Delivered programming and introductory AI/ML sessions to students aged 6–18 across 30+ sessions, using hands-on projects to develop coding, problem-solving, and logical thinking skills.

Full-Stack AI Code Reviewer, Outlier (Freelance) 11/2024 – 04/2025

- Reviewed and evaluated **50+ LLM-generated full-stack coding tasks** across **JavaScript, TypeScript, React, Node.js, and REST APIs**, identifying logical, architectural, **code-quality**, and **performance** issues.
- Provided technical feedback on **frontend implementations and backend integrations**, strengthening **code review** and **software quality assessment** skills.

Internships

Backend Development Internship with Node.js, Web Masters. 07/2025 – 09/2025

[Certificate](#) 📄

- Developed **RESTful APIs** and **real-time** features with **Socket.IO**, collaborating with a team on databases and backend services for multiple web applications.

Skills

Programming Languages: JavaScript (ES6+) | TypeScript | C++ | Python

Frontend Development: HTML5 | CSS3 | SASS/SCSS | Bootstrap | Tailwind | React.js | MUI | Next.js | Angular | i18n | UI/UX Design principles

Backend Development: Node.js | Express.js | MongoDB | Mongoose | SQL | NestJS | GraphQL

State Management: Context API | Redux Toolkit | Zustand | TanStack Query | RxJS | NgRx

Tools & Technologies: Git | GitHub | Docker | Azure | GCP | Postman | Swagger | Jira | Figma

Concepts: Data Structures & Algorithms | OOP | SOLID Principles | Design Patterns | Agile | Scrum

Agentic AI & LLMs: LLM Integration | Fine-Tuning | RAG | LangChain | LangGraph | Multi-Agent Systems

Personal Skills: Team Collaboration | Problem Solving | Communication | Leadership

Testing: Unit Testing (Jasmine, Karma, Jest) | E2E Testing (Playwright) | API Testing | TDD

Projects

Naqla, AI-Powered Recruitment Platform

[GitHub link](#) | [live demo](#)

- Developed an **AI-powered recruitment platform** that automates **CV parsing, candidate screening, and profile evaluation** using generative AI and **Pinecone vector search**.
- Built **responsive and reusable frontend components** and integrated recruitment workflows with **RESTful APIs**.
- Architected a **scalable full-stack solution** using **React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Redis, and BullMQ** to support AI-powered recruitment workflows and background processing.
- Built **secure RESTful APIs**, implemented **authentication and rate limiting**, and developed **interactive dashboards and hiring workflows** to streamline the recruitment process.

Draya, AI-Powered Learning Management System

[GitHub repo](#) | [live demo](#)

- Developed an AI-powered **RTL-first learning platform** using **Angular and TypeScript**, integrating with an ASP.NET Core backend through **RESTful APIs**.
- Translated **Figma UI/UX designs** into **responsive, reusable frontend components**, leveraging MCP and AI-assisted development workflows to accelerate implementation and maintain consistency with design specifications.
- Implemented **RAG-based exam generation** and specialized **AI agents** for exam generation, grading, topic-level weakness detection, and performance reporting using **Semantic Kernel and Azure**.
- Implemented **unit and E2E testing** using **Jasmine, Karma, and Playwright**, with **407 passing unit tests and 37 E2E tests** covering 11 critical user workflows.

DiagnoTech, Graduation Project

[GitHub repo](#) | [live demo](#)

- Built a **MERN web application** for **AI-powered healthcare**, enabling symptom analysis and doctor-patient matching.
- **Led a 7-member team**, coordinating task assignment, development, and project execution.
- Implemented **RESTful APIs** with authentication, authorization, and **role-based access control (RBAC)**.
- Improved **disease prediction accuracy by ~20%** through model selection, feature evaluation, and **hyperparameter tuning**, then integrated the model via **Flask API**.

FinTracker, Web Application

[Frontend repo](#), [backend repo](#) | [live demo](#)

- Built a **full-stack financial management application** using **Angular, TypeScript, Node.js, Express.js, and MongoDB**.
- Developed **responsive frontend workflows** for transaction tracking, recurring transactions, analytics, and reporting.
- Integrated Angular components with **RESTful APIs** and contributed to a **scalable application architecture**.

ShopWave, E-Commerce

[GitHub repo](#) | [live demo](#)

- Built a **full-stack e-commerce SPA** using **React.js and Tailwind CSS**, developing **reusable frontend components**.
- Implemented **global state management** with React Context and **server-state caching** with React Query.
- Integrated **end-to-end payment processing** using the **Stripe API** and connected frontend workflows with backend services.

Certificates

Cisco Certified Network Associate (CCNA) [↗](#)

Cisco Networking Academy

Web Development Diploma [↗](#)

SEF

Languages

- **Arabic** (Mother Tongue)
- **English** (Professional Working Proficiency)

Extracurricular Activities

Google Developer Student Clubs (GDSC)

Participated in technical workshops, collaborative events, and software development activities.
